What can we help you manage?	SEARCH

network management

Are you looking for network management software that's powerful, affordable, and easy to use? Your search is over! SolarWinds award-winning network management software makes it easy to discover and map network devices, monitor network performance, analyze network traffic, manage and back up network configurations, track IP addresses, find rogue devices, and much more.

BROWSE OUR NETWORK MANAGEMENT PRODUCTS

Network Performance Monitor

Powerful Network Fault & Availability Management

- Simplifies detection, diagnosis, & resolution of network issues – before outages occur
- Tracks response time, availability, & uptime of routers, switches, & other SNMP-enabled devices
- Shows performance statistics in real time via dynamic, drillable network maps
- Includes out-of-the-box dashboards, alerts, reports, & expert guidance on what to monitor & how
- Automatically discovers SNMP-enabled network devices & typically deploys in less than an hour

IP Address Manager

Centralized IP Address Management, Monitoring, Alerting, and Reporting

- Centralizes IP infrastructure management, monitoring, alerting and reporting
- Automatically scans IP address space at customizable, scheduled intervals
- Consolidates multi-vendor DHCP/DNS management via a single, integrated interface
- Delivers real-time, at-a-glance dashboard visibility along with historical tracking
- Provides active IP address conflict detection and preventative alerts

NetFlow Traffic Analyzer

Click for larger images

Real Time Network Utilization & Bandwidth Monitoring

- Monitors network bandwidth & traffic patterns down to the interface level
- Identifies which users, applications, & protocols are consuming the most bandwidth
- Highlights the IP addresses of top talkers and stores & displays flow data with up to one minute granularity
- Analyzes Cisco® NetFlow, Juniper® J-Flow, IPFIX, sFlow®, Huawei NetStream™ & other flow data
- Typically deploys in less than an hour

Network Bandwidth Analyzer Pack

Click for larger images

Comprehensive Network Bandwidth Analysis & Performance Monitoring

- Detect, diagnose, and resolve network performance issues
- Track response time, availability, and uptime of routers, switches, and other SNMP-enabled devices
- Monitor and analyze network bandwidth performance and traffic patterns
- Identify bandwidth hogs and see which applications are using the most bandwidth
- Graphically display performance metrics in real time via dynamic interactive maps

VoIP & Network Quality Manager

Proactive VoIP & WAN Performance Monitoring & Troubleshooting

- Monitors VoIP call Quality of Service (QoS) metrics including jitter, latency, packet loss, and MOS
- Correlates call issues with WAN performance for advanced troubleshooting
- Searches & filters call detail records
- Monitors site-to-site WAN performance using Cisco IP SLA technology
- Automatically discovers Cisco IP SLA enabled network devices & typically deploys in less than an hour

User Device Tracker

Automated Device Tracking & Switch Port Management

- Automatically discovers, maps and monitors switches, ports, and network devices
- Quickly finds devices and retrieves user name, port details, connection history and more
- Enables searching on IP address, user name, Hostname or MAC address to track endpoints
- Allows whitelisting and watch lists with automatic alerts and click-of-a-button port shutdown
- Provides detailed switch port usage data, capacity analysis, and built-in reporting

IP Control Bundle

Integrated IP Space Management & Endpoint Tracking

- Enables increased control over IP address proliferation and mobile network devices
- Provides integrated IP management, switch port monitoring, and endpoint tracking
- Delivers centralized visibility into IP address usage and connected users and devices
- Performs automated IP space scanning and network device discovery
- Simplifies IP infrastructure troubleshooting and enhances network access security

Firewall Security Manager

Multi-Vendor Firewall Security & Change Management

- Automates security & compliance audits with over 120 customizable, standards-based checks
- Analyzes complex firewall configurations to clean up rules, optimize performance, & reduce risk
- Delivers network-aware analysis to model changes, validate ACLs, & simplify troubleshooting
- Provides intuitive, customizable dashboard for instant visibility into risk profile & security status
- Tracks rule changes & maintains business justification history to ensure continuous compliance

Network Topology Mapper

Map Your Network Automatically in Just Minutes

- Automatically discovers and diagrams network topology
- Supports multiple discovery methods including SNMP, ICMP, WMI, CDP, VMware, Microsoft® Hyper-V® & more
- Exports network maps to Microsoft Office® Visio®, PDF, and PNG formats
- Delivers reports on switch ports, VLANs, subnets, and inventory
- Addresses reporting needs for PCI compliance, FIPS 140-2, and other regulatory requirements

Multicast Monitoring

The Best Network Management & Performance Monitoring Tools on the Planet!

We think our network management and monitoring software is a more practical choice than any other network management system (NMS) available today. But don't just take our word for it. Ask around and see what other network engineers have to say. They will tell you that SolarWinds network management tools are easy to evaluate, easy to buy, quick and easy to deploy, and really easy to use.

Power, affordability, and ease-of-use – what more can you ask for? Well, how about free product trials? Download a fully functional, free trial and, in less than an hour, you can start discovering and mapping network devices, monitoring network performance, analyzing network traffic, managing and backing up network configurations, managing your IP space, and more!

We even offer over 20 free tools that can make your life a little easier. They are yours to download and use forever – no strings attached! So what are you waiting for? Go ahead – take a look at all the options and then download something!

Are You Looking for Orion Network Management and Monitoring Tools?

You're at the right place! Our Orion products are undergoing a name change but they are still the great products that over 100,000 customers around the world use to manage LANs, WANs, network configuration, network traffic and bandwidth, VoIP, IP addresses, and more.

- Orion Network Performance Monitor is now SolarWinds Network Performance Monitor (NPM)
- Orion Network Configuration Manager is now SolarWinds Network Configuration Manager (NCM)
- Orion NetFlow Traffic Analyzer is now SolarWinds NetFlow Traffic Analyzer (NTA)
- Orion IP Address Manager is now SolarWinds IP Address Manager (IPAM)
- Orion IP SLA Manager is now SolarWinds VoIP Network Quality Manager

SOLARWINDS IS TRUSTED BY

WHAT PEOPLE SAY ABOUT OUR MONITORING SOFTWARE

"One day I was in Paris, France when I received an email announcing a problem with one of our users back in London. [Using Mobile Admin], I was able to unlock the user and reset his password in seconds. And all this from a café in Paris."

– Steve Sigsworth, IT System Support, ED&F Man Holdings Limited
